- GoldStix - Premium Multi-purpose Adhesive

List approved as of September 20, 2017

HydraStix 99 DS 99
Next generation DriSeal® for reducing moisture emissions

Note:

Due to the extremely non-porous nature of the DS99, extended adhesive open times can be expected. In non-porous installations, the adhesives will only dry from the top. Therefore, ambient environmental conditions (temperature & RH) will have a greater effect on adhesive dry time. During installation, the adhesive must be closely monitored to ensure that the floor coverings are installed at the proper time.
